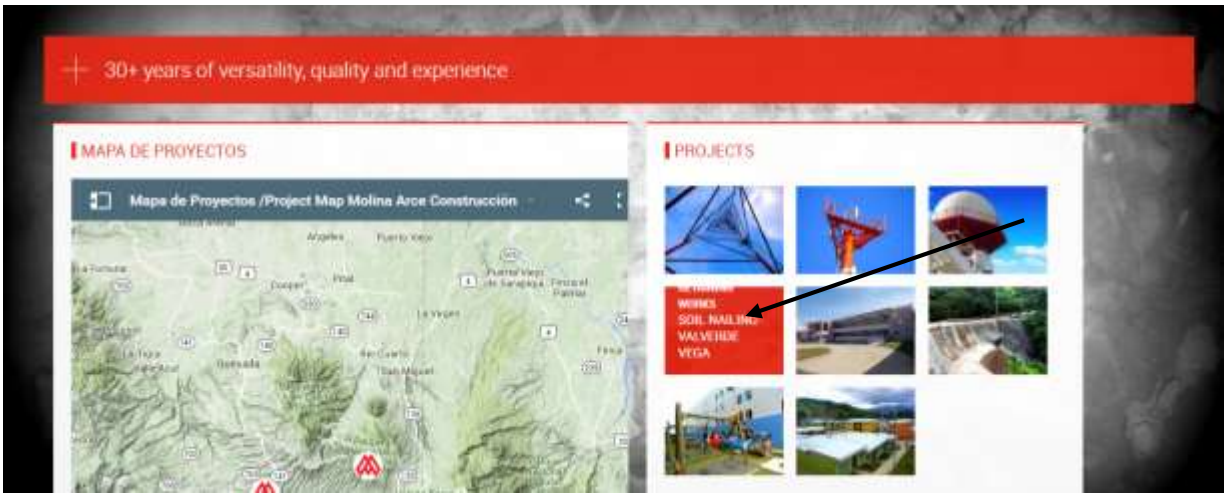
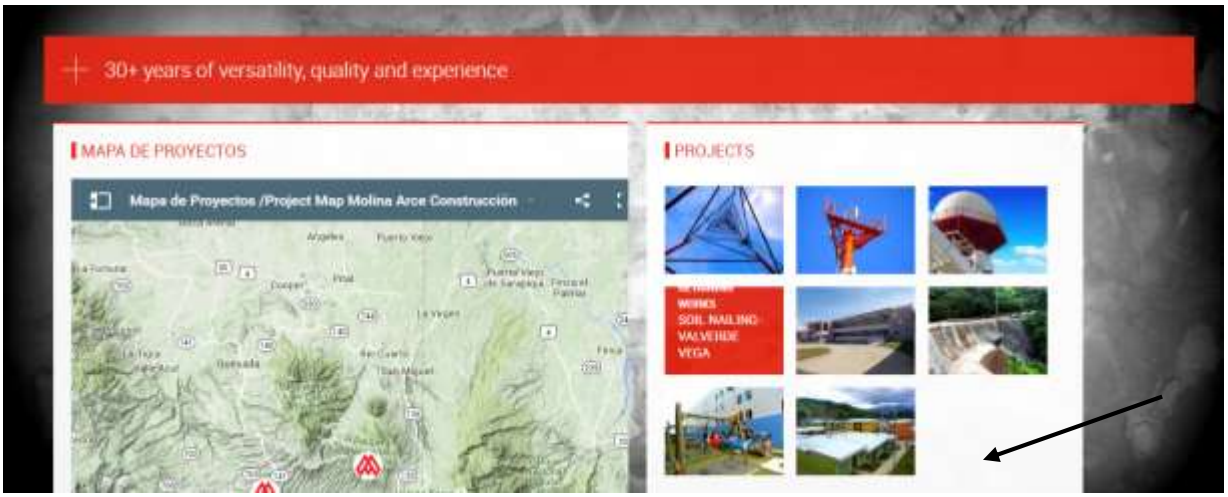
Website tasks: The following are a list of tasks to be performed on www.molinaarce.com both on the English and Spanish versions of the site.

2. Home Page

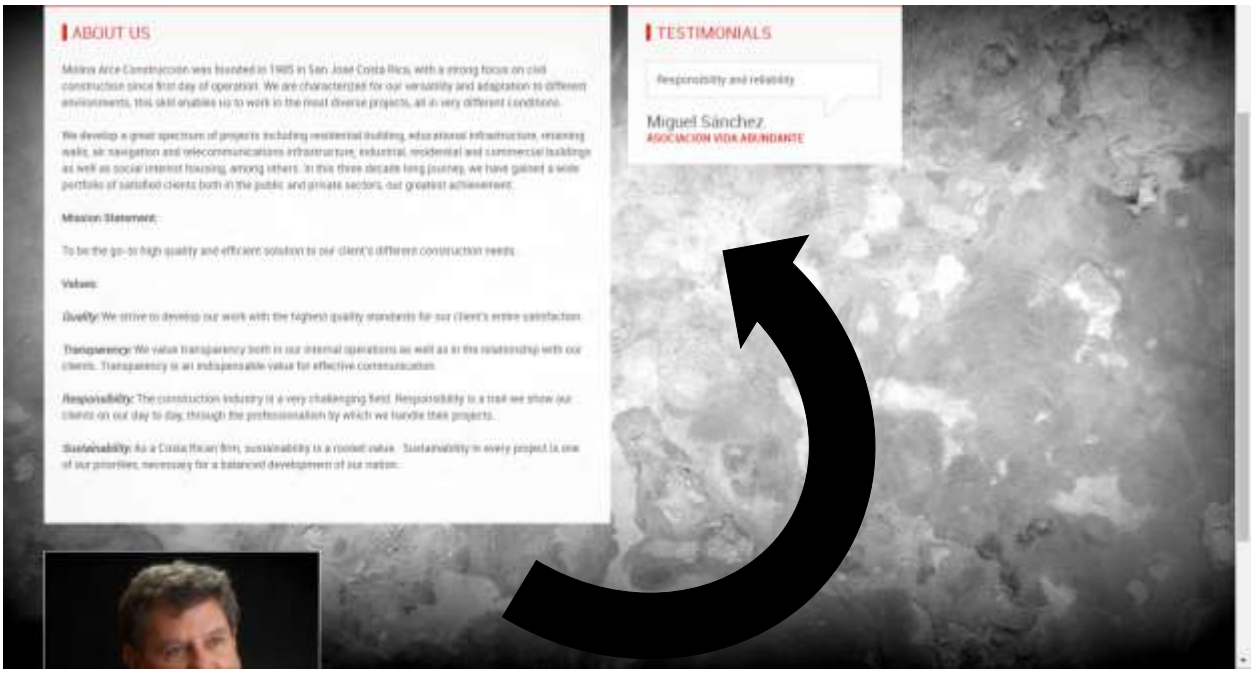
2.1 Project text not displaying correctly in “Home Page”.



2.2 9th Project not displaying in home page although it displays correctly on “Project Page”.

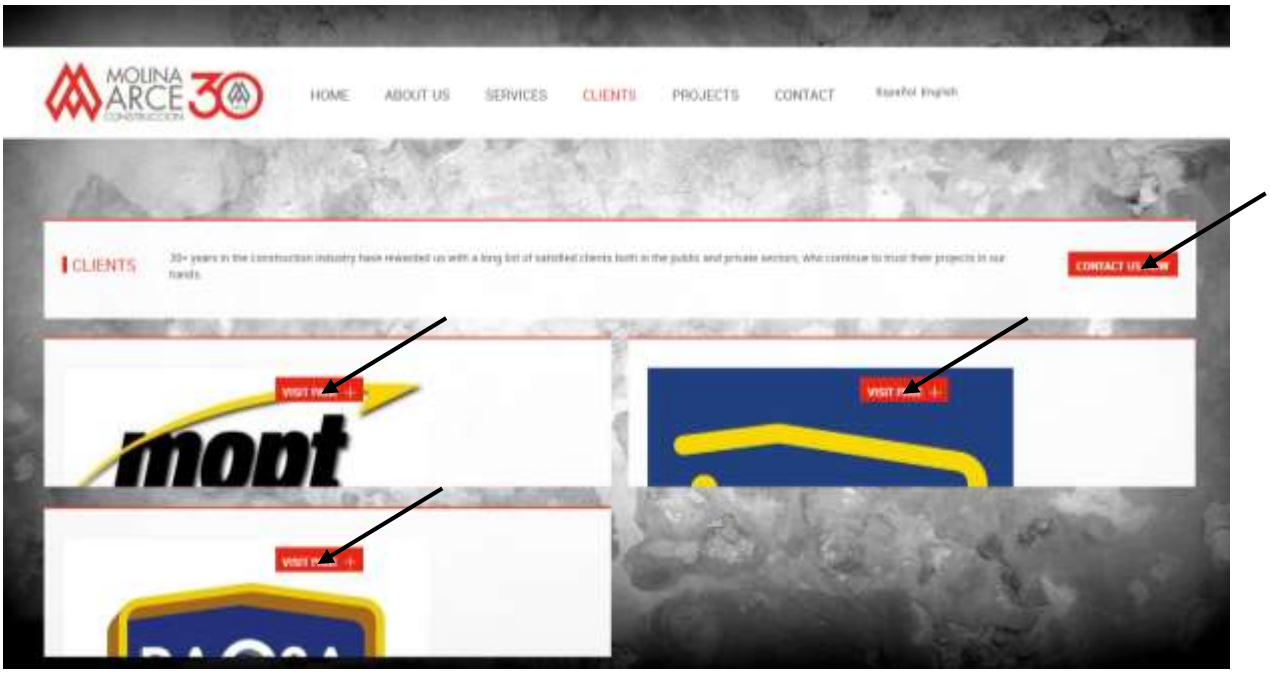


2.3 “About Us” Page: Please move presidents photo under testimonials and adapt photo size to fit nicely.

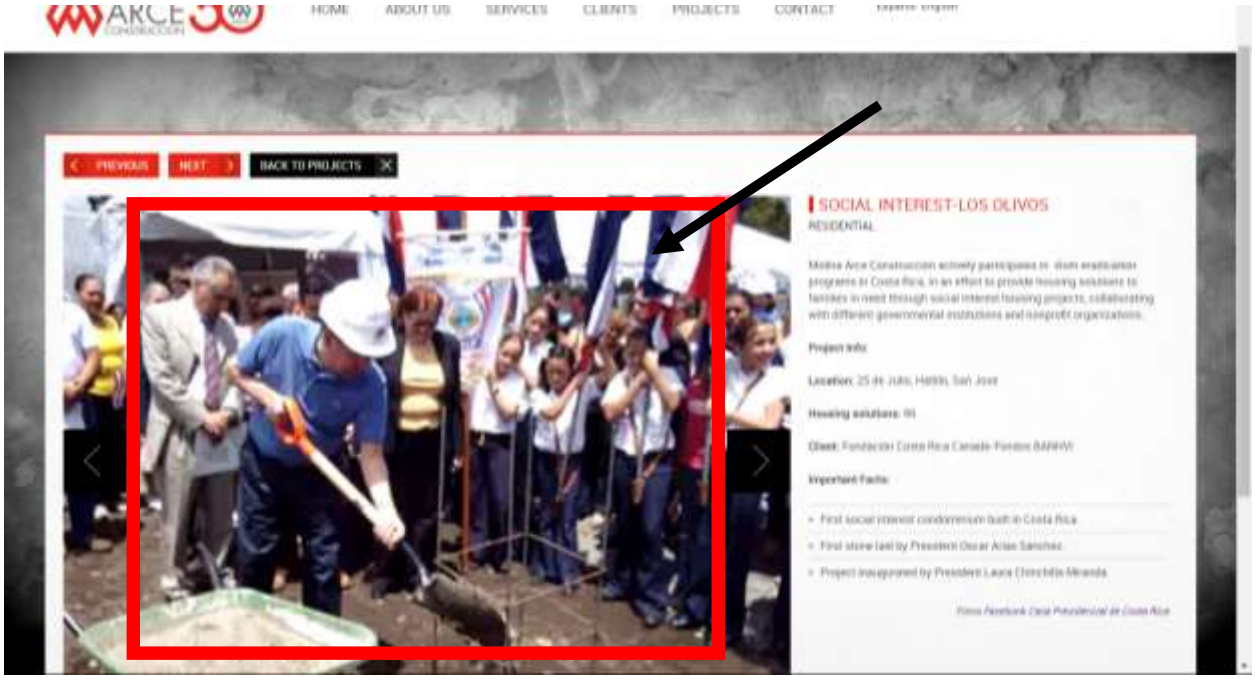


2.4 On “Services” page, please reduce size of each box and put the text box on the right side of the accordion, so that both elements are displayed next to each other and the accordion doesn’t look to empty.

2.4 On “Client” page, please permanently remove the indicated links and excess white space on boxes, and enable the logo sizes of clients to be viewed correctly in thumbnail view to be able to add more client logos. I’m interested on displaying only client logos.



2.5 Please reduce photo size of every Project post to avoid pixilation of smaller images. Images don't need to be that large.



2.6 Please make icons display correctly, they look cut on the left side.
